RemotePoint[®] Navigator 2.4 RF PRESENTATION REMOTE

Model: VP4150 North America
VP4160 Europe

CONFIDENCE. CONTROL. CREDIBILITY.

HIDE

When you need the audience to focus on you, hide your presentation with the press of a button. Press again and slides reappear.

BACK

Return to the previous slide with ease.

LASER

Highlight your key points with the integrated laser.

FORWARD

Advance slides with one touch accuracy from up to 50 feet away.

- Weight: Less than 2 ounces (60g)
- Power: 20 mA

SYSTEM REQUIREMENTS

- USB Capability
- Windows[®] 98, 2000, Me, XP
Mac OS 8.0 and higher

Confidence and credibility are critical to successful presentations. RemotePoint Navigator 2.4 puts slide control discretely in the palm of your hand. The compact size is comfortable to operate and raised icons identify options, even in the dark.

With up to 50 feet of wireless range, Navigator has no line-of-sight issues—allowing you to focus on your audience, not your slides. Every Navigator shares a unique code with its receiver and can communicate on 4 separate channels, preventing interference from other remote controls. The result: confidence, credibility and the peace of mind that comes knowing that every slide will advance reliably, at the moment you command it to.

Not a computer wizard? You don't need to be. Just plug in the USB receiver, pick up the RemotePoint Navigator 2.4 and start winning over the world—one audience at a time.
